

British founded accounting firm Dunlop Mills announces record growth results in its 10th anniversary year!

Said Dr. Dunlop, "I expected a flat recession year but I was wrong. Q1 started flat but by H1 we were up. Full year is now 40% up, another year of good growth in Romania in what is also our 10th anniversary here.

Most good foreign businesses continue to do well in Romania despite an economic 'hard landing' in 2008/9.

A new, more youthful, British Ambassador, primed for mid year 2010, can now move the British position forward for the new decade which starts on 1st January 2011 by promoting the successes of British business in this regional economic power.

To remain in the top ten sized economies, the U.K. must be among the top 10 investors, especially in the most important emerging countries such as Romania."

**It usually pays to invest in Romania!
The regional economic power!**

Stan Dunlop
